1. Qualitative Information on Quarterly Results

(1) Explanation of operational results

During the first nine-month period of the consolidated fiscal year under review (April 1, 2022 to December 31, 2022), the Japanese economy as a whole continued to show a gradual recovering trend. Non-manufacturing industries, chiefly service businesses, showed a sign of recovery after the government's coronavirus measures entered a new stage seeking coexistence with COVID-19. On the other hand, manufacturing industries suffered negative effects because of a global fall in demand due to the tightening of credit in the United States and Europe and re-expansion of infections in China and continuing high production costs, including raw material and fuel prices.

Under these circumstances, the Unitika Group has been endeavoring to realize "Building a robust business portfolio," "Promotion of the global business," and "Reformation of the corporate culture and awareness" under "G-STEP30, the 1st," a medium-term management plan that is in its final year.

Consequently, in the first nine-month period of the consolidated fiscal year under review, the Group reported net sales of 88,173 million yen (up 5.0% year on year). On the other hand, operating profit decreased to 1,769 million yen (down 63.9% year on year) due to the great impact of production cost increases caused by continuing high raw material and fuel prices and a weak yen. Furthermore, ordinary profit decreased to 2,414 million yen (down 46.6% year on year) and profit attributable to owners of parent fell to 1,101 million yen (down 64.9% year on year) since the Company posted a foreign-exchange valuation gain of assets denominated in foreign currencies due to a weaker yen compared to the beginning of the current fiscal year.

Here is an overview of the business results by segment.

[Polymers Segment]

The Polymers Segment had difficulty in securing profitability since demand, which had been strong, stagnated and there were negative effects of soaring raw material and fuel prices and a weak yen, despite its efforts to raise prices against sharp cost increases.

In the Films business, demand leveled off both in the packaging and industrial sectors. Orders decreased along with the adjustment of inventories in distribution channels. Even in such an environment, sales of high-value-added products, such as "EMBLEM-HG," a barrier nylon film, and "UNIPEEL," a silicon-free release PET film, continued to expand. Although the business revised its selling prices to cope with soaring raw material and fuel prices, profitability worsened since costs rose faster than price hikes. Accordingly, the Films business saw net sales increase but profit decrease.

In the Plastics business, sales increased supported by steady sales for leisure applications and the revision of sales prices, although the COVID-19 lockdown and expansion of infection in China led to a decline in factory operations for each application. On the other hand, the impact of a sharp rise in raw material and fuel prices exceeded the effect of the sales price revision. Accordingly, the Plastics business saw net sales grow and profit decline.

Consequently, the Polymers segment posted operating profit of 3,372 million yen (down 39.3% year on year) on net sales of 38,803 million yen (up 2.4% year on year).

[Performance Materials Segment]

In the Performance Materials Segment, sales for building material applications remained robust, but sales for electronics material applications decreased sharply. The segment struggled to remain profitable due to lingering impacts of rising raw material and fuel prices and transportation costs.

In the Activated Carbon Fibers business, demand for mainstay water purifier applications stagnated and sales for automobile applications were also sluggish.

In the Glass Fibers business, in the building sector, sales for incombustible tent and sheet applications were steady. In the electronic materials sector, demand for IC cloth declined drastically in the third quarter due to a worsening semiconductor market.

In the Glass Beads business, demand for road applications gradually recovered, but sales for retro-reflective material applications were weak.

In the Non-woven Fabrics business, sales almost remained unchanged in Japan, but export sales steadily grew. In addition, there were signs of recovery in demand for skin care applications.

In the Industrial Fibers business, sales decreased since demand for each application slackened. Furthermore, profitability worsened greatly due to soaring raw material and fuel prices.

Consequently, the Performance Materials segment posted operating loss of 51 million yen (versus an operating profit of 67 million yen in the previous year) on net sales of 26,210 million yen (up 2.8% year on year).

[Fibers and Textiles Segment]

In the Garments, Lifestyle Materials and Bedding business, business confidence deteriorated in Europe, retarding a recovery of export sales, while demand primarily for uniforms, a mainstay of this business, and women's clothing recovered in Japan. On the other hand, profitability deteriorated substantially due to higher cost factors throughout the supply chain, including surging raw material and fuel prices, the yen's depreciation, and soaring logistics costs.

Consequently, the Fibers & Textiles segment posted an operating loss of 1,491 million yen (versus an operating loss of 689 million yen in the previous year) on net sales of 23,103 million yen (up 12.4% year on year).

[Others]

The Others category posted an operating loss of 41 million yen (versus an operating loss of 29 million yen in the previous year) on net sales of 55 million yen (up 19.5% year on year).

(2) Explanation of financial position

Total assets increased by 6,621 million yen from the end of the previous consolidated year to 198,021 million yen mainly due to a rise in inventories and property, plant and equipment despite a decrease principally in cash and deposits, notes and accounts receivable-trade, and contract assets. Liabilities rose by 3,025 million yen from the end of the previous consolidated year to 151,353 million yen. This was primarily due to an increase in notes and accounts payable-trade. Net assets grew by 3,595 million yen from the end of the previous consolidated year to 46,667 million yen. This was mainly due to a rise in foreign currency translation adjustment.

(3) Explanation of future forecast information including forecast of consolidated performance Concerning the forecast of consolidated performance for the fiscal year ending March 31, 2023, please refer to the Company's notice announced on February 7, 2023, "Notice Concerning Posting of Non-Operating Income (Foreign Exchange Gains) and Revision of Forecast of Consolidated Performance for the Fiscal Year Ending March 31, 2023."

(Changes in accounting policies)

(Application of Accounting Standard for Fair Value Measurement, etc.)

"Implementation Guidance on Accounting Standard for Fair Value Measurement" (ASBJ Guidance No. 31, June 17, 2021; hereinafter "Fair Value Measurement Standard Implementation Guidance") has been applied from the beginning of the first quarter of the consolidated fiscal year ending March 31, 2023. In accordance with the transitional treatment prescribed in Paragraph 27-2 of the Fair Value Measurement Standard Implementation Guidance, the Company has decided to apply the new accounting policies set forth by the Fair Value Measurement Standard Implementation Guidance into the future. These changes had no impact on the quarterly consolidated financial statements.

(Segment information, etc.)

[Segment Information]

- I. Nine-month period ended December 31, 2021 (April 1, 2021 to December 31, 2021)
 - 1. Information on net sales, income or loss by reportable segment

(Unit: Millions of yen)

		Reportable	esegment					Amount posted in
	Polymers	Performance Materials	Fibers & Textiles	Total	Other (Note 1)	Total	Adjustment (Note 2)	Quarterly consolidated statements of income (Note 3)
Net sales								
Net sales to outside customers	37,881	25,499	20,563	83,944	46	83,991	_	83,991
